

Drawer removal		Drawer insertion	
<p>To remove the drawer, squeeze the orange locking devices in the direction indicated by the arrow on both sides of the drawer.</p> 	<p>While squeezing the locking devices, slide the drawer outward and upward. Gently place the drawer down.</p> 	<p>To insert the drawer, position it on the runners and check that the pins at the back of the runners are aligned with the holes at the back of the drawer.</p> 	<p>Push the drawer straight back until it clicks into place. Check that the drawer is correctly positioned by opening & closing the drawer.</p> 

Adjustment of runners			
<p>Side adjustment: +/-1.5mm</p> <p>On both sides of the drawer, turn the dials via the locking devices in the direction you wish to adjust the drawer.</p> 	<p>Height adjustment: +3mm</p> <p>Remove the drawer. Squeeze the plastic component indicated in the diagram below and slide it back to raise the height of the drawer. Repeat on the other runner.</p> 	<p>Tilt adjustment:</p> <p>Remove the drawer. To tilt the drawer front forward, turn the dials shown in the diagram below toward the centre of the drawer.</p> 	<p>Depth adjustment: +2/-1mm</p> <p>To bring the drawer front back, roll the dials shown in the diagram below, on both runners backward. Roll the dials forward to bring the drawer front forward.</p>
