

PLEASE NOTE:

- * All units in mm. Dimensions are a guide only - please take measurements from the product where possible
- * Allow for floor coverings (eg: tiles) when measuring from finished floor level (FFL)
- * Ensure the wall cavity is at least 90mm
- * Use a DN100 waste pipe for S-trap installations
- * Run an electrical cord from the bottom of the junction box, long enough to connect to the pan
- * Consult with a hydraulic consultant or plumber on the installation of high-hazard backflow prevention in accordance with AS/NZS3500.1
