Installation Notes:

- Maximum working pressure 500kPa. If it exceeds 500kPa, a pressure limiting valve must be fitted.
- The highest water and environment temperature is 60°C.
- The faucet contains two sets of check valves for backflow prevention. Do not remove them.
- All installations must comply with local plumbing codes and requirements of AS/NZS 3500, AS/NZS 6400 and the plumbing code of Australia (PCA).
